

# WiFi中继器

## 快速配置说明

→1、中继器接通电源：  
中继器是通过USB供电的，插在电脑上  
或者使用USB充电头进行供电。

→2、安卓手机终端，可通过碰触NFC  
或系统扫码功能，快速跳转到中继器  
设置界面。苹果手机用户，请使用手  
机相机扫描二维码，点击识别到的链  
接，跳转到中继器设置界面；  
注意：设置完成后，因中继器的WiFi  
名称和密码发生改变，不能再使用以  
上快速连接操作。

→3、配置WiFi中继：  
终端连接中继器WiFi信号后，系统会自  
动弹出弹出设置页面，在弹出的页面选  
择需要连接的WiFi信号，再按照向导进  
行操作，即可完成WiFi信号中继放大；

通过无线连接进行设置时，WiFi中继  
器的红灯常亮表示未设置状态；当完  
成设置后，若成功连接WiFi中继器会  
常亮绿灯；若连接失败则会常亮红灯；  
若连接信号弱则会常亮蓝灯。

AP模式：  
WiFi中继器支持AP模式，当中继器设  
置成AP模式后，可通过网口把有线网  
络转换成无线网络：

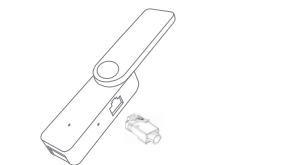

终端登录中继器的管理页面后，点击  
页面左下角的“AP设置”，切换到AP模  
式设置页面：

2、设置好WiFi名称和WiFi密码后提  
交即可完成AP设置：

3、设置完成后，把上级路由器的网线  
接入到中继器侧面的网口，就可以把有  
线网络转换成无线网络。

## WiFi Range Extender

### Quick configuration Instructions

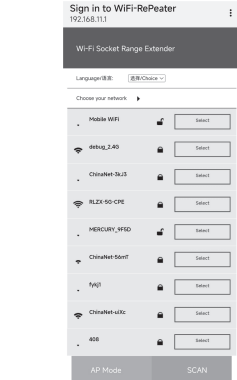

→ 1. WiFi Repeater power on: plug  
on the computer or use USB charger  
for power supply.

→ 2、On an Android phone, you can  
quickly jump to the repeater setting  
interface by touching the NFC or  
system scan function. For iPhone users,  
please use the camera to scan the QR  
code and click the identified link to  
jump to the repeater setting interface.  
Note: After the setup is complete, the  
above quick connection operation can  
no longer be used due to the change  
of the WiFi name and password of the  
repeater.

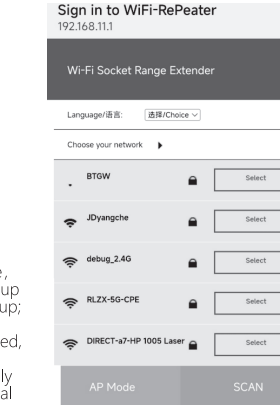

→ 3. Configure WiFi relay: After the  
terminal connects WiFi Repeater SSID,  
System will automatically pop up the S  
ettings page, select the WiFi SSID that  
needs to connect in the pop-up page,  
then operate according to the wizard  
to complete WiFi signal relay  
amplification.

When WiFi Repeaters is not set state,  
alternating red light will always light up  
Through the wireless connection setup;  
When the setup is completed, if the  
WiFi repeater is successfully connected,  
the green light will always light up;  
If the connection fails, would normally  
on a red light; If the connection signal  
is weak, the blue light will always light  
up.

AP mode:  
1、WiFi repeater supports AP mode.  
After the repeater is set to AP mode,  
the wired network can be converted  
to wireless network through the  
network port:

2、After setting the WiFi name and  
WiFi password, submit it to complete  
the AP setting:

3、When the setting is complete, the  
network cable of the upper router is  
connected to the network port on the  
side of the repeater, you can convert  
the wired network into a wireless  
network.
